

Clay P. was referred to the Peer Recovery Program on March 2012 and was assigned to Coach Owens, where they developed his recovery plan. The first goal of his plan was to develop and maintain a foundation of recovery. He has done this by finding a home group and sponsor. The second goal was to reconnect with his family (sisters, children and grandchildren). He participated in regular home visits that resulted in family reunification. The third goal was to address his medical concerns. He has addressed this by maintaining all of his doctor's appointments and by following the doctor's orders. Clay has demonstrated an unyielding determination and total commitment to the recovery process. Clay is a positive motivating force for other members of the Recovery Program and well deserving of this spotlight.
